

Addendum

As a follow-up to the June 24, 2004 public workshop in Chinatown, the potential initiatives presented were posted so members of the Chinatown community who were unable to attend the workshop would have an opportunity to contribute to the Chinatown Access and Circulation Study. The information was posted on the LMDC website (www.renewnyc.com/chinatown) for a month. Community members were encouraged to participate via newspapers, radio, other relevant workshops, and direct electronic mailings.

A total of 42 individuals fully completed the online questionnaire, and ranked the impact each initiative had on the Chinatown community as it related to (1) access and circulation; and (2) quality of life. Each initiative was ranked on a scale from 1-5, with 5 being the highest. Overall, the results of the online voting closely resemble the results of the workshop voting with Chatham Square Reconfiguration, Coach Bus Plaza, and the Parking Garage ranking the highest. One noticeable difference is that online voters seemed to think more positively about most of the initiatives as the actual numeric ranking value was higher than for workshop voters. A detailed data analysis is enclosed.

The results from the total 114 respondents (workshop plus online) are shown in the tables below.
