# Table of Contents

4. **Urban Design and Visual Resources**
   - 4.1 Introduction .................................................................................................................. 4-1
   - 4.1.1 Context ....................................................................................................................... 4-1
   - 4.1.2 Conclusions ............................................................................................................... 4-2
   - 4.2 Current Conditions Scenario ......................................................................................... 4-4
     - 4.2.1 Existing Conditions 2003 ....................................................................................... 4-4
     - 4.2.2 Future Without the Proposed Action 2009—Current Conditions Scenario ............... 4-10
     - 4.2.3 Probable Impacts of the Proposed Action 2009—Current Conditions Scenario ........ 4-11
     - 4.2.4 Future Without the Proposed Action 2015—Current Conditions Scenario ............... 4-18
     - 4.2.5 Probable Impacts of the Proposed Action 2015—Current Conditions Scenario ........ 4-19
   - 4.3 Pre-September 11 Scenario ........................................................................................... 4-24
     - 4.3.1 Baseline Conditions ............................................................................................... 4-24
     - 4.3.2 Future Without the Proposed Action 2009—Pre-September 11 Scenario ................. 4-27
     - 4.3.3 Probable Impacts of the Proposed Action 2009—Pre-September 11 Scenario .......... 4-28
     - 4.3.4 Future Without the Proposed Action 2015—Pre-September 11 Scenario ................. 4-33
     - 4.3.5 Probable Impacts of the Proposed Action 2015—Pre-September 11 Scenario .......... 4-33

5. **Historic Resources**
   - 5.1 Introduction .................................................................................................................. 5-1
     - 5.1.1 Context ....................................................................................................................... 5-1
     - 5.1.2 Conclusions ............................................................................................................... 5-2
   - 5.2 Regulatory Context ....................................................................................................... 5-6
     - 5.2.1 National Historic Preservation Act (Section 106) ..................................................... 5-6
     - 5.2.2 Section 4(f) of the Federal Department of Transportation Act ................................ 5-8
     - 5.2.3 State Historic Preservation Act .............................................................................. 5-8
     - 5.2.4 New York City Landmarks Law ............................................................................ 5-9
     - 5.3 Methodology ............................................................................................................... 5-9
     - 5.3.1 Identification of Historic Properties/Structures ....................................................... 5-9
     - 5.3.2 Assessment of Potential Effects on Historic Resources ......................................... 5-10
   - 5.4 Identification of the Area of Potential Effects ............................................................... 5-10
     - 5.4.1 Archaeological Resources ..................................................................................... 5-10
     - 5.4.2 Architectural Resources ........................................................................................ 5-11
   - 5.5 Current Conditions Scenario ....................................................................................... 5-11
     - 5.5.1 Existing Conditions 2003 ....................................................................................... 5-11
     - 5.5.2 Future Without the Proposed Action 2009—Current Conditions Scenario ............... 5-38
     - 5.5.3 Probable Impacts of the Proposed Action 2009—Current Conditions Scenario ........ 5-40
     - 5.5.4 Future Without the Proposed Action 2015—Current Conditions Scenario ............... 5-43
     - 5.5.5 Probable Impacts of the Proposed Action 2015—Current Conditions Scenario ........ 5-44
   - 5.6 Pre-September 11 Scenario ........................................................................................... 5-45
     - 5.6.1 Baseline Conditions ............................................................................................... 5-45
     - 5.6.2 Future Without the Proposed Action 2009—Pre-September 11 Scenario ................. 5-46
     - 5.6.3 Probable Impacts of the Proposed Action 2009—Pre-September 11 Scenario .......... 5-47
     - 5.6.4 Future Without the Proposed Action 2015—Pre-September 11 Scenario ................. 5-48
     - 5.6.5 Probable Impacts of the Proposed Action 2015—Pre-September 11 Scenario .......... 5-49

6. **Open Space**
   - 6.1 Introduction .................................................................................................................. 6-1
     - 6.1.1 Context ....................................................................................................................... 6-1
     - 6.1.2 Conclusions ............................................................................................................... 6-3
   - 6.2 Methodology and Screening for Impacts ................................................................. 6-8
     - 6.2.1 Open Space Impacts ............................................................................................. 6-8
     - 6.2.2 Pedestrian-Level Wind Conditions ..................................................................... 6-11
   - 6.3 Current Conditions Scenario ..................................................................................... 6-13
     - 6.3.1 Existing Conditions 2003 ....................................................................................... 6-13
     - 6.3.2 Future Without the Proposed Action 2009—Current Conditions Scenario .............. 6-18

23-7 Boiler Facility—Stack Parameters and Emission Rates ........................................................................ 23-40
23-8 Cogeneration Facility Alternative—Cogeneration Unit Scenario Maximum Predicted Total Concentrations ........................................................................ 23-41
23-9 Cogeneration Facility Alternative—Centralized Units Scenario Maximum Predicted Total Concentrations ........................................................................ 23-42
23-10 Boiler Plant Maximum Predicted Total Concentrations ........................................................................ 23-43
23-11 Boiler Plant and Individual Cogeneration Unit Scenario Maximum Predicted Total Concentrations ........................................................................ 23-43
23-12 Boiler Plant and Centralized Cogeneration Units Scenario Maximum Predicted Total Concentrations ........................................................................ 23-44
# List of Figures

### Executive Summary
- Figure S-1 World Trade Center Site, Pre-September 11, 2001 ................................................................. S-2
- Figure S-2 World Trade Center Site, Post-September 11, 2001 ................................................................. S-2
- Figure S-3 World Trade Center Site, Current Conditions ................................................................. S-4
- Figure S-4 Project Location ........................................................................................................ S-4
- Figure S-5 Proposed Site Plan ..................................................................................................... S-12
- Figure S-6 Proposed Site Plan with Route 9A At-Grade ............................................................... S-12

### 1. Project Description
- Figure 1-1 Project Location ........................................................................................................ 1-2
- Figure 1-2 Proposed Site Plan with Route 9A Bypass ........................................................................... 1-22
- Figure 1-3 Proposed Site Plan with Route 9A At-Grade ........................................................................ 1-22
- Figure 1-4 Reflecting Absence By Michael Arad and Peter Walker ...................................................... 1-22
- Figure 1-5 View of Freedom Tower from New York Harbor ............................................................. 1-22
- Figure 1-6 West Slurry Wall and Box Beam Column Bases .............................................................. 1-34
- Figure 1-7 Other Major Projects .................................................................................................. 1-40

### 2. Methodology
- Figure 2-1 Land Use Study Area ..................................................................................................... 2-10
- Figure 2-2 No Build Sites: Current Conditions Scenario ............................................................... 2-10
- Figure 2-3 No Build Sites: Pre-September 11 Scenario ................................................................. 2-10

### 3. Land Use and Public Policy
- Figure 3-1 Land Use Study Areas .................................................................................................. 3-4
- Figure 3-2 Primary Study Area Land Use: Current Conditions Scenario ........................................... 3-6
- Figure 3-3 Existing WTC Site ........................................................................................................ 3-6
- Figure 3-4 Secondary Study Area Land Use: Current Conditions Scenario ........................................ 3-10
- Figure 3-5 Zoning Map ............................................................................................................... 3-14
- Figure 3-6 Primary Study Area Land Use: Pre-September 11 Scenario ........................................... 3-30
- Figure 3-7 Secondary Study Area Land Use: Pre-September 11 Scenario ........................................ 3-32

### 4. Urban Design and Visual Resources
- Figure 4-1 Urban Design and Visual Resources Current Conditions Scenario ............................. 4-2
- Figure 4-2 Urban Design and Visual Resources Current Conditions Scenario ............................. 4-4
- Figure 4-3 Urban Design and Visual Resources Current Conditions Scenario ............................. 4-4
- Figure 4-4 Urban Design and Visual Resources Current Conditions Scenario ............................. 4-4
