

Worker Safety Drill

The LMDC will be conducting a worker evacuation *drill* tomorrow morning, October 18th, at approximately 11am for the workers on the 130 Liberty Street jobsite. Air horns will sound and workers will be evacuating the building. Some of the workers may be wearing white tyvec suits which are required during the abatement work associated with the erection of the scaffolding.

Safety is of the utmost importance to the LMDC as well as everyone working on this project and more of these drills can be expected as the project progresses. E-updates will be sent out in advance of these drills.
