

AMBIENT AIR MONITORING PLAN AMENDMENT FORM: Issue 2

DATE FORM SUBMITTED: 9/6/06

Document Title **Ambient Air Monitoring Program**
130 Liberty Street Deconstruction Project
September 7, 2005

AMENDMENT #2

Abatement work areas will not proceed more than four floors below the scaffold air monitoring stations. Before relocation of scaffold monitors, appropriate modifications of the Ambient Air Monitoring Program will be proposed for acceptance by EPA.

Reason for Amendment:

EPA has requested that this be noted in the Ambient Air Monitoring Plan to ensure that the scaffold air monitoring stations are monitoring both the abatement and structural deconstruction activities that are in close proximity to these air stations.

Sections of Ambient Air Monitoring Plan Affected:

2.1, Network Design: The proposed amendment will be included in the bullet for on-site scaffolding air monitoring stations.

6.3, Phase I – Asbestos and COPC Abatement Phase, Table 4: Proposed amendment will be included within the footnote for on-site scaffolding air monitoring stations.

6.4, Phase II – Structural Deconstruction, Table 5: Proposed amendment will be included within the footnote for on-site scaffolding air monitoring stations.

Date Implemented:

September 2006 (Phase I)
